## Company Profile

TRACO Electronic AG is a Swiss company with headquarters based in Baar, Switzerland. As a leading power supply specialist with more than 40 years experience we are dedicated to the design and manufacturing of high quality DC/DC and AC/DC power conversion products.

TRACO markets its products worldwide under the registered trademark TRACO POWER. Our mission is to provide our customers with optimal power supply solutions in terms of performance, quality and cost for their individual application.

## Ruggedized DC/DC Converters For Railway and Industrial Applications

DC/DC converters for railway and ruggedized industrial applications must withstand greater disruptive forces than most stationary applications and are subject to greater demands for operational safety, durability and thermal shock. European standards EN 50155 and EN 61373 were established to provide internationally recognized standards for these type of applications. These standards are now considered to be the defacto symbol of quality, indicating robustness, reliability and durability in the railway and transportation sectors and applications with extreme environments.

**EN 50155** defines the minimum input requirements for DC/DC converters as follows:

Bus Voltage	Continuous input voltage range	Brownout 100 ms	Transient 1 sec	TRACO POWER railway DC/DC input ranges
24 VDC	16.8-30.0 V	14.4 V	33.6 V	Satisfied by 9~36 VDC input range products
37.5 VDC	26.2-47.0 V	22.5 V	52.5 V	Satisfied by 18~75 VDC input range products
48 VDC	33.6-60.0 V	28.8 V	67.2 V	Satisfied by 18~75 VDC input range products
72 VDC	50.4-90.0 V	43.2 V	100.8 V	Satisfied by 43~160 VDC input range products
96 VDC	67.2-120.0 V	57.6 V	134.4 V	Satisfied by 43~160 VDC input range products
110 VDC	77.0-137.5 V	66.0 V	154.0 V	Satisfied by 43~160 VDC input range products

**EN 50155** sets these additional requirements:

- Galvanic isolation to protect electronic circuits
- Standards for immunity and susceptibility from conducted / radiated noise
- Relative humidity levels up to 95% relative for 30 consecutive days

**EN 61373** defines that DC/DC converters must provide continuous operation under these stresses:

- Random vibration - frequency range of 5-150 Hz @ 5grms (5hrs per axis)
- Shock - peak acceleration of 5g/2g/1g (duration: 50ms/20ms/20ms.)

**All TRACO POWER DC/DC converters classified as “Railway”** are extremely robust and safety qualified to meet EN 50155 and EN 61373. They offer continuous operational input ranges that exceed EN 50155’s defined ranges with galvanic isolation up to 2250 VDC (input to output / input to case). Our DC/DC modules are fully enclosed and encapsulated with additional filtration circuits to protect from radiated / conducted noise while providing ruggedized mechanical protection from shock, vibration, humidity and air particles such as dust and water. Additional qualification for the fire behaviour of components according to EN 45545-2 and overall temperature ranges from -40 to +85°C ambient ensure all our products are safe and of the highest quality for operation in extreme environments.

TFI **NEW!** 0-300 Watt

- Clamps over voltage transients (up to 385 VDC) at 168 VDC
- Universal use: Can be used with any DC/DC converter
- Complies with RIA12, NF F 01-510 Surge susceptibilities
- Wide input voltage range: 43-160 VDC
- Brownout voltage 36 VDC min.
- Operating temperature range -40 to +95°C
- 3-year product warranty

- Compact 2.3"x1.45"x0.5" standard package
- Ultra-wide 12:1 input voltage range 9–75, 14–160 VDC
- EN 50155 and EN 61373 approval for railway applications
- Qualification for fire behaviour according to EN 45545-2
- I/O-isolation 3'000 VAC
- High efficiency up to 92%
- Operating temperature range –40°C to +85°C
- Under-voltage lockout circuit
- Adjustable output voltage & Remote On/Off

150 Watt

- Shielded metal case with screw terminals
- Ultra wide 4:1 input voltage ranges
- 9-36, 18-75, 43-160 VDC
- EN 50155 approval for railway applications
- Very high efficiency up to 89%
- Constant current output characteristic for battery load applications
- Optional with input filter to meet EN 55032 class B
- Wide Operating temperature range: -40°C to +75°C
- Under voltage lock-out, overtemperature & reverse input protection
- Easy chassis and wall mounting
- 3-year product warranty

For more information, datasheet and certifications  
please visit our website [www.tracopower.com](http://www.tracopower.com)

TRACO POWER dedicated to design and production of high quality, state-of-the-art DC/DC & AC/DC power conversion products. Our mission is to provide optimal power supply solutions for specific applications with regard to performance, quality, cost and functionality.

TRACO POWER stocks an average of USD 25+ million in available finished goods inventory for immediate shipment through our distribution partners.

TRACO POWER offers extended product life-cycles, typically 10+ years, and our products are supported by a 3 or 5 year product warranty. We understand our customers require a high quality solution as well as a diverse product offering, availability from stock, extended life-cycles and a strong commitment to quality in the form of extended warranty to support their business.
